

INTERDISCIPLINARY STUDIES IN AGING

SEMINAR SERIES

REGISTER OR JOIN US FOR UPCOMING TALKS

People aged 60 and older make up approximately 12% of the global population, and by 2050, that number will rise to almost 23%. Understanding how to better study and serve older adults and encourage healthy aging is key. The seminar is for students, researchers, care providers and community members to help us better understand aging and work together to address critical issues that affect us all. Students can register for credit under PSY 492E (CRN 80474).

**Enter from the West entrance facing the Max bus station
and take your first left when you enter the building**
